Description

Metrohm Australia invites you to an academy designed specifically for the users of Metrohm's titration software, Tiamo.

Are you getting the most out of your Metrohm Software?

Tiamo is a control and database software for titrators, dosing devices and sample changers that allows complete laboratory automation, which is why the name tiamo stands for «titration and more» - tiamo™ can do far more than just titrate.

This course is designed for the everyday Metrohm Titration user.

Programme

Training of basic use of the software - Introduction to a wealth of tips and tricks for efficiency and precision including:

- Monitoring instrument data
- Basic method writing
- Importing/exporting methods and results
- Creating databases
- Importing sample data
- Streamlining use of sample table
